DETAILED ACTION

Response to Amendment

The applicant's amendment, received 12-1-2008, overcomes the examiner's rejection. Hence claims 1, 3-4, 8, 14-16 and 19-23 are allowed while claims 2, 5-7, 9-13 and 17-18 are cancelled.

1. The applicant's terminal disclaimer is acknowledged. Thank you.
2. The examiner interprets claim 1 as describing that the mobile unit and network (eg. base station(s)) are performing the method steps described. The applicant's specification and figures clearly show that these are the apparatuses involved. The examiner makes this comment in order to obviate any circumstance where a USC 101 issue could arise based on the fact that a method claim must explicitly/positively identify the apparatus(es) performing the steps taught. (See John Love memo from 5/08 and recent Supreme Court precedent and recent Federal Circuit decisions

Claim 1 states: A method comprising: receiving a polling request that specifies a first temporal period and a first temporal offset for a plurality of expected future transmissions from a first station; establishing a polling schedule based on said polling request; receiving a plurality of frames for forwarding to said first station; determining whether the arrival times of said frames are substantially periodic as described by a second temporal period and a second temporal offset; and establishing, when the arrival times of said frames are substantially periodic, a transmission schedule for transmitting each of said frames to said first station; wherein said transmission schedule

is based on said second temporal period and said second temporal offset; wherein said transmission schedule is also based on said schedule; and transmitting each of said frames to said first station in accordance with said transmission schedule, wherein said transmitting and said receiving said plurality of frames are via a shared-communications channel”.

The underlined portions above show explicit apparatuses, eg. mobile and network/BTS, performing the steps of the method and thusly the claim is statutory.

3. Claim 1 uses the term “substantially” which is fully defined in the specification for determining if a transmission is periodic. Refer to the definitions found in paragraphs 42-45, 49-56, 58-65, 67-76 and 78-88 of the applicant's specification.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

1. The applicant has amended as per the recommendations of the examiner. He therefore believes the claims to be novel over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312.

To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Claim 1 is a "Method Claim" but does not positively identify which statutory apparatus is performing the method steps. To be compliant with USC 101 requirements, eg. a method claim must identify a statutory apparatus, the examiner puts forth the following Examiner's Amendment which finds support in applicant's specification (at least figure 2 and Para #25):

"1. A method performed by an Access Point comprising:
receiving a polling request that specifies a first temporal period and a first temporal offset for a plurality of expected future transmissions from a first station...."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen M. D'Agosta whose telephone number is 571-272-7862. The examiner can normally be reached on M-F, 8am to 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dwayne Bost can be reached on 571-272-7023. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
